

The Portable AQUA Wetland System (AWS)

Features:

- allows for quick & easy on site pilot scale testing
- fully portable AWS allowing for quick set-up
- four - 4'W X 4'L X4'D AWS cells
- fully insulated for winter time operation
- digital pump controls for accurate flow monitoring

The Portable AQUA Wetland System (AWS)

Features:

- Easy access to sample ports at each AWS cell
- Easy access to digital pump controls for accurate flow monitoring
- Heated pump gallery allowing winter time operation

AWS Sample ports

The Portable AQUA Wetland System (AWS)

Features:

- Pre-planted with Bullrush (Scirpus sp.)
- Fully mature system allows for quick data recovery

Summer time flood manifolds

Winter time flood manifolds

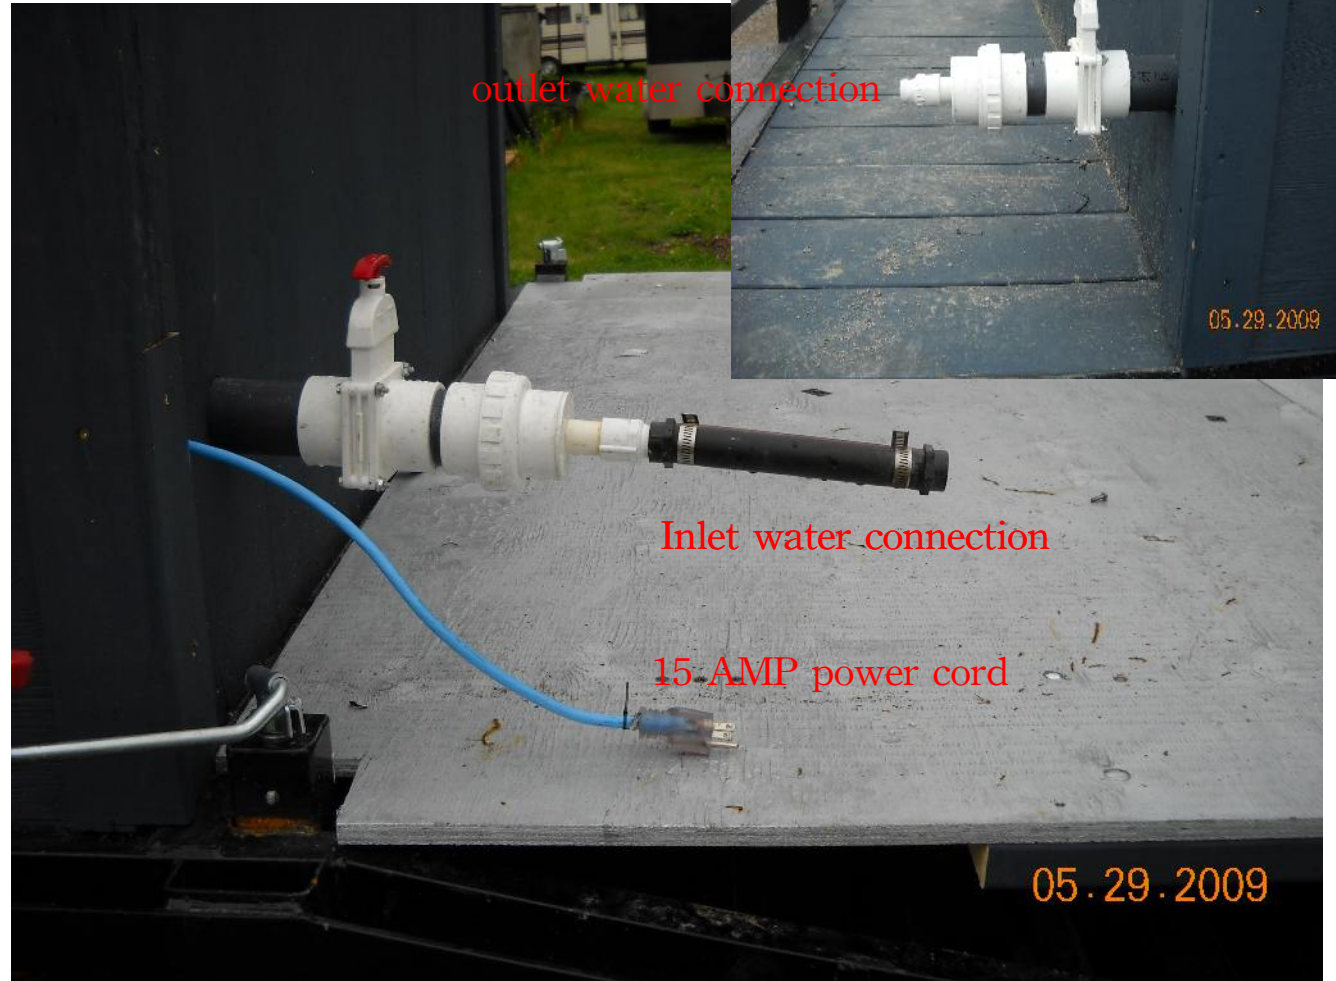

The Portable AQUA Wetland System (AWS)

Features:

- Requires one 15 AMP outlet to operate in Summer
- Requires two 15 AMP outlet to operate in Winter
- Easy-hook up to influent/effluent waste water stream

1.2 AMP dosing pumps
operated by float

The Portable AQUA Wetland System (AWS)

Features:

- Viewing platform allowing for easy inspection & monitoring
- 30' X 25' footprint required
